- Data Analytics & Server-Side Tracking
- SEM & Paid Advertising

Headquarters

Ansari Market, Unit #05, Rehman Street, Brandreth Road, Lahore 54010, Punjab, Pakistan.

Disclosure Statement

“Not affiliated with Meta, Google, or TikTok.”

2. Services & Scope

Page introduction from digiminds.org/faq: "Clear answers on how DigiMinds scales revenue through precision performance marketing, CRM integration, and data-driven strategy."

Q1. What exactly does DigiMinds do as a digital marketing agency?

A. We engineer closed-loop revenue systems. Instead of just running ads and reporting on superficial clicks, we integrate advanced performance marketing with CRM automation. Our goal is to track every marketing dollar from the initial impression directly to closed-won revenue, ultimately lowering your Customer Acquisition Cost (CAC) and scaling predictable pipeline growth.

Q2. Why should I hire a Fractional CMO instead of an in-house marketer?

A. A Fractional CMO provides you with executive-level strategic direction without the overhead of a full-time C-suite salary. You gain access to seasoned leadership that builds your overarching growth architecture, manages specialized execution teams, and aligns your marketing efforts directly with your financial targets.

Q3. Do you build websites and landing pages?

A. Yes, but strictly for performance. We design and develop high-converting landing pages and conversion-rate-optimized (CRO) websites tailored specifically to capture leads, reduce bounce rates, and drive maximum sales from our advertising campaigns.

3. Ecommerce & Scaling

Q4. Do you work with dropshipping or only private-label brands?

A. We specialize in scaling established private-label brands and businesses with secure supply chains. Our aggressive performance marketing and retention strategies are designed for brands looking to maximize Customer Lifetime Value (LTV), which requires controlling product quality and the customer fulfillment experience.

Q5. How do you scale Shopify stores?

A. We scale Shopify brands by optimizing the entire unit economics equation. This includes deploying advanced media buying (like PMax and Advantage+), implementing dynamic retargeting, improving Average Order Value (AOV) through backend CRO, and building robust email and SMS retention funnels to drive repeat purchases.

Q6. Do you manage Performance Max and Advantage+ campaigns?

A. Absolutely. We heavily leverage AI-driven campaign types like Google's Performance Max (PMax) and Meta's Advantage+ Shopping. However, because these algorithms rely heavily on data, our true edge lies in feeding them superior creative assets and flawless server-side conversion data so they are forced to find your highest-value buyers.

4. Lead Generation, Tracking & Data

Q7. Do you do lead generation for service businesses?

A. Yes. We build end-to-end lead generation engines for B2B and high-ticket B2C service businesses. We don't just generate form fills; we integrate directly with your CRM (HubSpot, Salesforce, Zoho, etc.) to score, route, and track leads through to the final sale, ensuring zero pipeline leakage.

Q8. How do you track WhatsApp and COD (Cash on Delivery) sales for Pakistani and GCC ecommerce stores?

A. Tracking offline or chat-based conversions is a major challenge in the GCC and APAC regions. We solve this by implementing custom server-side tracking (CAPI) and advanced CRM integrations. We push finalized WhatsApp lead data and verified COD order statuses back into Google and Meta. This trains the ad algorithms to optimize for actual revenue, not just preliminary messages or unverified, returned orders.

5. Process & The Audit

Q9. What is included in the free DigiMinds digital marketing audit?

A. Our audit isn't an automated PDF; it's a manual, executive-level teardown of your current growth architecture. When you book an audit, you receive:

Full Funnel Deep Dive: We identify the exact leaks in your current ad-to-CRM pipeline.

Creative Gap Analysis: We review your current ad creatives and messaging against top-performing industry benchmarks.

Custom 60-90 Days Roadmap: We provide a strategic blueprint detailing exactly how we will scale your revenue and drop your CAC.

6. Free Profit Audit — What's Included

The following is reproduced verbatim from digiminds.org:

Stop Funding Ad Algorithms. Start Scaling.

“Schedule your free 30-minute Profit Audit. We'll show you exactly where your budget leaks are — and plug them with a proven system.”

The Three Deliverables

- **Full Funnel Deep Dive**
- **Creative Gap Analysis**
- **Custom 90-Day Roadmap**

How to Book

Booking the free audit is done via Calendly at calendly.com/digimindsLtd/30min, via the “Book a free audit” button on the site, or via direct WhatsApp message to the number listed below.
